THE IDEA OF LEADS

The transformation of business in this VUCA world, leadership has become as much ‘technology’ driven, as it remains to be an ‘art’, in an environment where change is the only constant. An environment wherein convergence between seemingly divergent philosophies of self-reliance and globalization is essential. An environment wherein independence and interdependence will go hand in hand, when we look at future global partnerships.

Over 2 days, global leaders will share their vision on reimagining the world through:

Leadership Excellence Adaptability Diversity Sustainability
